Att: Greg Taylor

11 January 2016

Dear Greg

I just wanted to commend you for introducing us to the Nano Car glass treatments. We had 20 of our Renault Premium Lander 440 truck tractors windscreens treated and we had significant success.

We had an approximate 20% saving in costs of replacement windscreens as windscreens do not break on the first stone's impact. Drivers reported that they have improved visibility at night and in the rain.

In my opinion this should be a standard safety improvement on all new vehicles.

We look forward to continuing our mutual business relationship.

Sincerely

Leon Bosch
Divisional Director
Imperial Tipper Resources
